

GEPAS

ABOUT US

Gepaş was established in September 2014 with a young and dynamic team, quickly adapting to the new order of a world that is becoming smaller, in order to benefit from all the opportunities of the 21st century.

Since our establishment, we have provided services and established business partnerships with leading institutions in the relevant sectors in areas such as media, production, project management, administrative consultancy, communication, advertising, sports, sponsorship management and event management.

Since 2016, we have undertaken the management of the entertainment system of the Turkish State Railways' High-Speed Train fleet. At the same time, we have been serving as the supplier of all media content for this platform.

In addition, with our expert team, we continue our work in mobile game development, animation, cartoon series production and content supply.

Since the day it was founded, our company has placed ethical values at the forefront, believes that there is always another perspective, and is modern, innovative and adaptable to change. In today's world, we maintain the highest level of sensitivity toward both social and corporate social responsibility.

WHAT DO WE DO?

CONSULTANCY

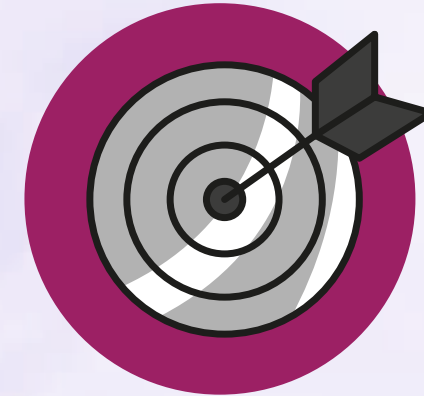

ADVERTISING

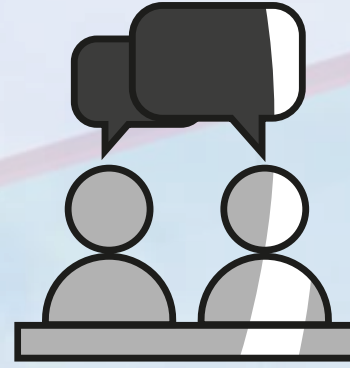

SERVICES

MEDIA

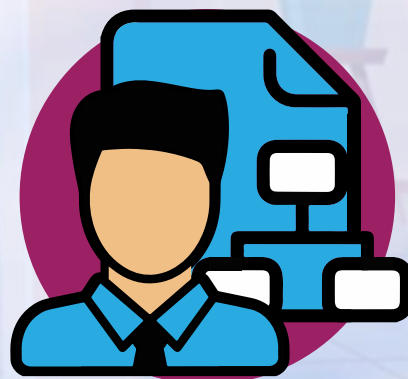

EVENTS

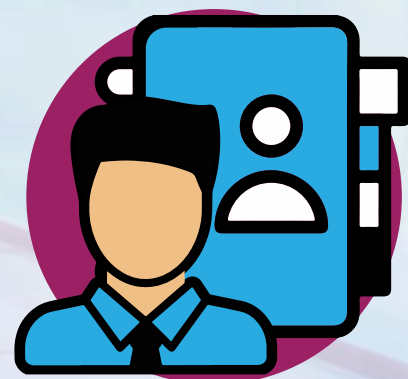

CONSULTANCY

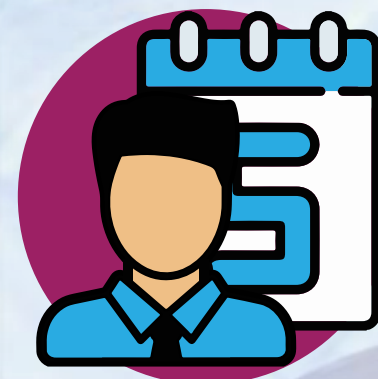

Together with all our business partners for whom we provide administrative consultancy, we have taken steps that deliver maximum contribution within the optimum timeframe.

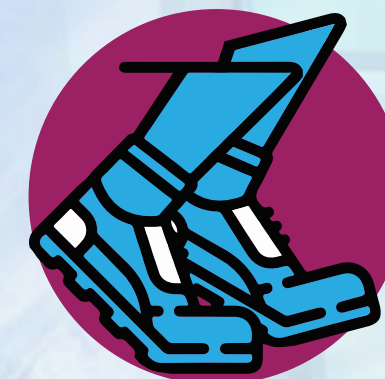

**Strategic Management
Consultancy**

**Communication
Consultancy**

**Administrative
Consultancy**

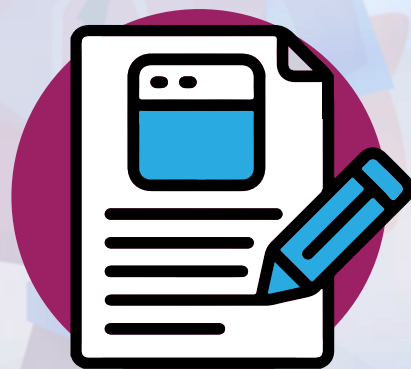

Sports Consultancy

ADVERTISING

Our marketing team set out to do what had not been done in the advertising sector and brought together numerous media channels with the right locations, the right timing and the right brands.

HIGH-SPEED TRAIN ENTERTAINMENT SYSTEM

The High-Speed Train Entertainment System, established within Gepas in 2016 and managed by a team of seven specialists, successfully carries out the planning of content in various genres—including films, sports, documentaries, cartoon series, animation and music—for broadcast on trains. The team also manages content acquisition from domestic and international companies, censorship editing, monitoring, localization, conversion, metadata, scheduling and material traffic processes.
